HURONIA CAN ASSIST YOU WITH AODA COMPLIANCE

Recent amendments to the [Accessibility for Ontarians with Disabilities Act \(AODA\)](#) has substantially enhanced the building codes for new construction and existing buildings that are undergoing extensive renovations.

These changes are designed to improve accessibility to businesses for people with disabilities; affording them greater independence, dignity and access to everyday products and services.

Proactive businesses are seeing this as an opportunity to get ahead of the demands from your baby boomer Customers - many of whom over the next ten years may be using wheelchairs, walkers or canes.

Huronia's commercial customers are also seeing this as an opportunity to enhance their existing loss prevention programs - for example, if a cashier has to leave their position to open a door for someone in a wheelchair, they run the risk of increased theft or loss of property. An automatic door opener would help prevent those potential losses.

Huronia is proactively working with our commercial customers to help them retrofit their existing spaces, and helping our builder and contractor partners fit new builds with AODA compliant products and services including:

- Power door operators for entrances, amenity rooms and barrier-free and universal washrooms
- Universal washroom products that include an emergency call system, strobe lights, emergency buttons near toilets and audible alerts inside the washroom
- Visual fire and smoke alarms for public corridors in residential, multi-use residential suites and barrier-free and universal washrooms
- Levered door handles to replace traditional round knob-styles for renovation projects
- Low energy, fully automatic and slide automatic doors
- Enhanced lighting products to accommodate those with reduced or low vision

Call or [email](#) us today to talk about ways Huronia can help your commercial, industrial, institutional or multi-use residential property comply with the new regulations.
