

Huronia

MESSAGE FROM THE PRESIDENT

David P. Clark, participating in the Everest Challenge 2019 at Blue Mountain

I would like to take this opportunity to thank our customers, suppliers, colleagues and community partners for a phenomenal first 100 days on the job. I joined Huronia in October after a lengthy career on the design and manufacturing side of the security industry, and one of the main reasons I decided to join the Huronia Team is because of the company culture. You hear the words "company culture" a lot nowadays, as more and more value is being placed on the importance of an inclusive, meaningful and supportive work-life balance for employees. As the new kid on the block, I can say that Huronia has this in spades. When I work in each of our three offices, I see smiling faces, welcoming attitudes, and a willingness to learn from each other.

That willingness to learn, adapt and grow is a key component of my management plans and priorities for the coming years. In conjunction with the leadership team, I plan to develop and execute enhanced strategic plans within each of our business division silos. No small task, but I'm ready and excited to help advance this business.

Every year Huronia continues to grow with intention and purpose. My role is to ensure that Huronia has

the processes, procedures, best practices and resources in place to continue to support this growth. I believe that our ability to leverage our expertise and collaborate seamlessly across our three offices will ensure that our Customers experience increased efficiencies, unique solutions and top-notch technical and customer service support - All things that you have come to expect from Huronia.

We have a great team in place, from sales through to installation and customer service support; we are working together at every level of our organization to enrich your experience with Huronia.

I look forward to meeting more of you at the community events that Huronia sponsors and participates in. From climbing mountains to raise money for our local hospital, to walking a mile in high heels to support the fundraising efforts of our local women's shelters, to cheering on our kids athletic teams.

David P. Clark, President

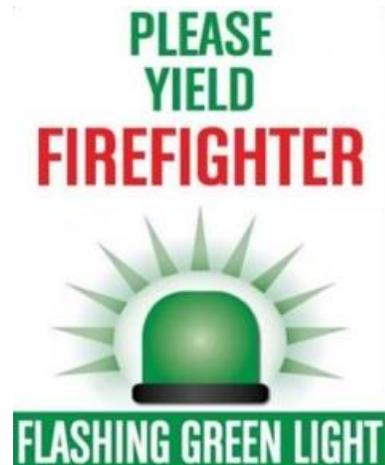

DO YOU KNOW WHAT A FLASHING GREEN LIGHT ON A VEHICLE MEANS?

If you saw a green flashing light in a vehicle behind you, would you know what that meant? And would you know what to do?

A flashing green light is an indication that a volunteer firefighter is on the way to an emergency situation. It is estimated that there are 19,000 volunteer firefighters in Ontario that are driving personal vehicles equipped with these green flashing lights.

If you see this flashing green light, please attempt to pull over and let this vehicle pass. At present, you are not legally required to pull over, as in the case of pulling over for a fire truck, ambulance or police car with their lights and sirens on, however, in doing so you may be assisting firefighting efforts in your community.

The use of the flashing green lights is exclusive to the Ontario fire service.

BE WARM AND SAFE THIS WINTER!

According to our colleagues at the [National Fire Protection Association](#), half of home heating equipment fires are reported during the months of December, January and February.

- The NFPA recommends keeping anything that can burn (curtains, blankets, newspaper, clothing, etc.) at least one metre away from heating equipment (furnace, fireplace, wood stove and portable space heaters)
- Remember to turn portable heaters off when you leave the room, or go to bed.
- Test smoke alarms at least once a month to ensure they are in good working order, and ensure that there is a working smoke alarm on every storey and outside all sleeping areas in your home
- Have all fuel burning appliances inspected (visit [COSafety.ca](#) to find a licensed contractor near you)

[Click here](#) for more tips and precautions to keep your family and friends safe this winter when the temperature drops, and you turn to the heating equipment you use to keep your home warm up.

Home Heating Safety - tips from the NFPA

PLEASE JOIN US IN WELCOMING ...

Radek Korczynsk is our newest Fire Safety Technician working out of the Midland office and Aron Knight, our new Sales Representative, who will be working out of the Collingwood office. As Huronia continues to grow, we are always looking for talented individuals to join our team. From security and life safety technicians, to installers, sales, finance and administrative personnel, if you know of someone who is looking for an opportunity with a family owned and operated business that is dedicated to customer satisfaction, please contact us. Please also visit our [Careers page](#) for some of the latest opportunities available at Huronia.

HURONIA OUT AND ABOUT IN THE COMMUNITY

The weather outside was frightful in the final days of 2019, but thankfully the weather indoors at the Bracebridge Sportsplex Indoor Climbing Wall was warm and delightful!

Huronialarms.com was the proud sponsor of this initiative that allowed children an opportunity to try their hands (and feet!) at climbing. The event was well-attended and the climbing wall was surrounded by parents, grandparents and siblings cheering the climbers on!
