### MIDLAND FIRE DEPARTMENT LAUNCHES SAFE HOME PROGRAM

The Midland Fire Department launched their Smoke Alarms For Every (SAFE) Home program on May 15th, 2018. This is a home survey program that will focus on fire and CO safety and provide an opportunity to educate the public about the prevention of fire in the home. Midland Fire Chief Paul Ryan was quoted as saying "having properly installed and working smoke and CO alarms, along with developing and practicing a home escape plan are the most important steps a person can take to protect their family. Smoke and CO alarms deteriorate and must be replaced approximately every 10 years, so we encourage residents to take advantage of this voluntary program to ensure their homes are properly protected." The SAFE Home program will run until October 31, 2018, however residents can request a home survey any time of the year by calling 705-526-4279 ext. 2239. ### SMOKE ALARM PLACEMENT

Wondering where the best place is to install a smoke alarm? The Ontario Association of Fire Chiefs recommends that you "stay away from dead space". Because smoke rises, alarms should be placed on ceilings. Correctly placed smoke alarms may sound sooner, and may better help save lives and prevent damage to property. Homeowners must install and maintain smoke alarms on every storey of their home and outside sleeping areas.
